

E- LEARNING SKILLS TESTING CHECKLIST

HeartStart Training conducts skills testing for the American Heart Association E-Learning Course for participants who have successfully completed the online Part 1. Participants must present a completion certificate granting them entrance to a skills practice session (Part 2) and skills test (Part 3) with a certified American Heart Association instructor. Participants must pass the skills test to qualify for an AHA course completion card. It is important that students understand what is required to obtain a course completion card. Please review the following procedures prior to skills testing and please initial all locations that apply.

_____ Part 1 AHA completion certificate given to the instructor

_____ My instructor reviewed skill station components and I was given an opportunity to review skills sheets

_____ I was given an opportunity to practice required skills through self-directed practice or by instructor led practice

_____ The instructor reviewed the equipment that will be used during skills testing and explained its operation to me

I confirm that I have reviewed all above procedures, I was given the opportunity to ask questions and I am ready for skills testing. I am aware the fee paid to HeartStart Training Inc. is for skills testing only PASS or FAIL. I am aware, as per guidelines, failure to successfully complete skills testing may require registration for an American Heart Association renewal course.
